

ALL-BOND 2[®]

Universal Dental Adhesive System

ALL-BOND 2, the original 4th Generation adhesive, is still unsurpassed in its comprehensive ability to bond to dentin, enamel, new or old composite, precious, semi-precious and non-precious casting alloys, silane-treated porcelain, and new or old amalgam.

ALL-BOND 2 has a dual-cured primer for higher conversion rates, and contains BISCO's own patented* hydrophilic monomer (BPDM).

FEATURES AND BENEFITS

FEATURES

The GOLD standard

- bonds to all substrates
- used for all bonding procedures
- compatible with light-, dual- & self-cured materials

Dual-cured

Combination of primers with D/E (Dentin/Enamel) Resin

UNIQUE BENEFITS

Universal - the only adhesive system needed in the operatory

Ensures complete polymerization under any restorative condition

Results in the highest bond strength on the market

CLINICAL SIGNIFICANCE

- Proven clinically in over 200 research articles and over 18 years showing efficacy.
- Can be used for bonding amalgams without cementation products.

Universal Dental Adhesive System

ORDERING INFORMATION

KIT CONTENTS

ALL-BOND 2 KIT B-42500A
 1 Syringe UNI-ETCH[®] with BAC (5g), 1 Bottle Each Primers A & B (6ml ea.),
 1 Bottle D/E Bonding Resin (6ml), 1 Bottle PRE-BOND Resin (3ml),
 Accessories, Technique Guide, Instructions/MSDS

REFILLS

PRIMER A & B SET B-2510A
 1 Bottle Each ALL-BOND 2 Primers A & B (6ml ea.), Instructions/MSDS

PRIMER A or B B-2511A
 1 Bottle Primer A (6ml), Instructions/MSDS
 1 Bottle Primer B (6ml), Instructions/MSDS B-2512A

DENTIN/ENAMEL (D/E) BONDING RESIN B-2502A
 1 Bottle (6ml), Instructions/MSDS

PRE-BOND RESIN B-2506A
 1 Bottle (6ml), Instructions/MSDS
